LA SOUSTRACTION (5) (à l'aide des tables)

1- Calcule avec la méthode des bonds.

$7 - 3 = \dots$ $\begin{array}{|c|c|c|c|c|c|c|} \hline | & | & | & | & | & | & | \\ \hline 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 \\ \hline \end{array}$

$147 - 3 = \dots$ $\begin{array}{|c|c|c|c|c|c|c|c|} \hline | & | & | & | & | & | & | & | \\ \hline 142 & 143 & 144 & 145 & 146 & 147 & 148 & 149 \\ \hline \end{array}$

$377 - 3 = \dots$ $\begin{array}{|c|c|c|c|c|c|c|c|} \hline | & | & | & | & | & | & | & | \\ \hline 372 & 373 & 374 & 375 & 376 & 377 & 378 & 379 \\ \hline \end{array}$

$207 - 3 = \dots$ $\begin{array}{|c|c|c|c|c|c|c|c|} \hline | & | & | & | & | & | & | & | \\ \hline 202 & 203 & 204 & 205 & 206 & 207 & 208 & 209 \\ \hline \end{array}$

2- Écris des calculs que tu peux faire en t'aidant du premier.

$\underline{9} - \underline{4} = \underline{5}$
$20\underline{9} - \underline{4} = 20\underline{5}$
$12\underline{9} - \underline{4} = 12\underline{5}$
.....
.....
.....

3- Complète.

4- Écris les résultats des soustractions.

$8 - 2 = \dots$ donc $15\underline{8} - \underline{2} = \dots$

$9 - 3 = \dots$ donc $29\underline{9} - \underline{3} = \dots$

$7 - 3 = \dots$ donc $52\underline{7} - \underline{3} = \dots$

$8 - 4 = \dots$ donc $40\underline{8} - \underline{4} = \dots$

RÉVISIONS Finis de tracer les trois rectangles.
